American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP). To answer that question, Treasury is seeking responses that describe generally how the CPP investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP investment was deployed or how many CPP dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP funds were outstanding).

| ^ | than otherwise would have occurred. | The loan portfolio has declined in the past year due to economic conditions and normal runoff. We are pursuing every lending opportunity and with the help of the CPP Capital we were able to maintain normal lending standards for qualified customers. |

What actions were you able to take that you may not have taken without the capital infusion of CPP funds?

| Market Street Bancshares, Inc. (MSB) received CPP Capital on May 15, 2009. Since that time MSB has used the CPP Capital to establish a non-leveraged LLC for the purpose of holding certain well collateralized classified loans. By using the CPP Capital in this way, it has benefitted MSB and its wholly owned subsidiary Peoples National Bank (PNB) in the following ways:                                                                                                                                                                                                                                        |

| 1) Allows more time to negotiate with borrowers to resolve credit issues and/or to proceed with the orderly liquidation of the collateral.  2) Helps maintain strong capital and loan loss reserve ratios both in PNB and MSB.  3) By isolating certain loans in the LLC, we can continue to concentrate on meeting the credit needs of our customers. MSB was able to maintain a net Loan to Deposit ratio as of 12/31/09 of 89.45% vs. a Loan to Deposit ratio as of 3/31/09 of 90.56%, indicating that even in a time of declining loan demand, the bank was able to maintain a very positive Loan to Deposit ratio. |
| As a Community Bank our most important function is to make credit available in our market area. The CPP Capital has allowed us to take a longer, more constructive approach in dealing with credit issues that have arisen and more importantly, to continue to serve as a source of funding for thousands of customers who want and need our services.                                                                                                                                                                                                                                                                 |
